## **DETAILED ACTION**

### **Allowable Subject Matter**

Claims 1-8, 10-16, 21-23 are allowed.

The following is an examiner's statement of reasons for allowance: the prior art of record failed to teach a first set of oval or circular pockets inboard of a second set of rectangular shaped pockets. U.S. Patent No. 3,135,486 to Wing teaches pockets recessed into the skin of the leading edge. In Wing, thicker portions of the skin surround the pockets. The thicker portions are necessary for riveting the skin to the wing substructure, while the thinner pockets result in a lighter weight leading edge member. Since Wing is concerned with weight reduction, it could conceivably have been obvious to modify Wing to incorporate any of the numerous possible pocket shapes to achieve a leading edge with better weight reduction than the rectangular pockets of Wing, or to achieve a more advantageous arrangement of thick portions for riveting, however it is not considered obvious to modify the shape of an inboard set of pockets while keeping an outboard set rectangular, nor would it have been obvious to design the inboard set as circles and ovals. Furthermore, while the leading edge of Wing is configured to deform in a certain fashion (as are all leading edges), Wing does not discuss the deformation of the leading edge through impact, and therefore it would not be clear from the teachings of Wing that different shapes of pockets result in different deformations.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael Kreiner whose telephone number is (571)270-5379. The examiner can normally be reached on Monday-Friday 9am-5:00pm (EST).
